VIDEO ENTRY SYSTEM

Flush Mount

Surface Mount

Surface Mount Curved

Internet Connection - Wired or Wireless

Voice or Video calling and access management from anywhere with the DKS Cloud

- The 2112 eVolve is our most advanced and versatile Video Entry System, allowing the homeowner or system users the ability to grant entry to guests even from thousands of miles away.
- The 2112 features Video or Voice calls in a broadcast mode for up to 4 phones simultaneously when the call button is pushed.
- The 2112 control dashboard is browser based, so all that's needed is an internet connection and a web browser to access Entry System settings such as users, access time zones, entry codes and more.
- Residents can quickly grant guests access from their home phone or smartphone.
- Able to control up to three entry points, the 2112 eVolve operates with an internet connection or an optional cellular connection.

NEW eVolve Technology Inside

Internet or Cellular Connection

Use your existing internet connection or optional cellular connection for easy Plug & Play connectivity

Upgraded Camera

With a powerful camera and enhanced ISO sensitivity, you'll get a crystal-clear, detailed image day or night.

Live Video Streaming

Users with the DKS video calling app downloaded to their smartphone are able to communicate with guests via video stream

Voice Communication

Talk to guests at a front door or gate from any telephone in the home, or mobile phone

Broadcast Calling

Access requests from the call button can ring up to 4 phones simultaneously.

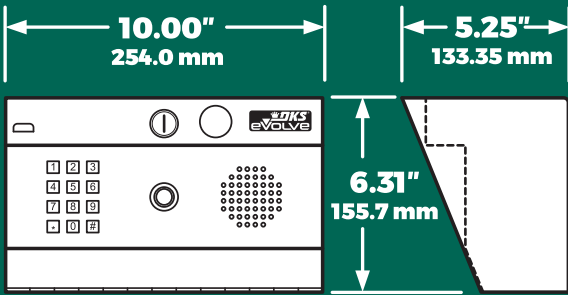

Control from Any Device, Anywhere

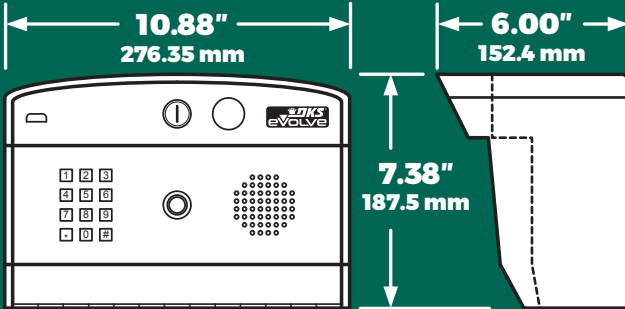

Administrators can access system settings from any browser via the cloud.
